

FibaTape self-adhesive

# FibaTape® Xtreme

Brand

ADFORS FibaTape®

Fibreglass mesh tape designed to adhere to cold walls, providing a secure grip even in environments with extreme temperature and humidity.

## Product Overview

When buildings are constructed, areas within a project are often exposed to thermal extremes. For example, rooms may be cold at the beginning of the day as they have been empty overnight, but will then heat up over the course of the day as work begins. These thermal extremes combine to create a moist and humid environment that requires special products. ADFORS FibaTape® Xtreme™ is uniquely designed to adhere to cold walls and maintain a strong tack as humidity levels increase, making it ideal to withstand this extreme change in temperature.

This joint tape adheres in environments with very high humidity

- Extreme tack
- Self-adhesive
- High mechanical strength
- Easy application
- Smooth finish

## Specifications
