

Pet Resistant Screen

Resists tears and damage
caused by pets

Ultra-strong Pet Resistant Screen for strength, durability & safety

Designed to resist damage caused by household pets, ADFORS Pet Resistant screen is more durable than traditional fiberglass screen thanks to its thick, tear-resistant polyester yarn. It can be used in any door or window and is a smart solution for those who repeatedly have to replace screens.

ADFORS Pet Resistant screen is the only screen on the market whose coating makes it flame resistant by passing the ASTM requirements D3656, D6413, as well as ISO11925-2. Visit www.adfors.com to see the flame tests completed using ISO11925-2 testing standards. ADFORS is also leading the industry by making our full line of fiberglass and polyester screen ortho-phthalate free, ahead of industry standards.

Features and benefits of Pet Resistant Screen:

- Heavy duty screen prevents tears and damage from household pets
- Ideal for areas where pets or children push against the screening
- Durable, yet still allows for excellent outward visibility and airflow

Pet Resistant screen is available in DIY pre-cut and 100' contractor rolls. An all-in-one replacement kit is also available which includes screen, spline, and an installation tool making it simple to upgrade the screen in an existing door or window. ADFORS .125" spline is recommended for the best fit in a standard frame.

Flame Resistant 

Pet Resistant FAQ

Will this prevent my pet or child from running through the screen?

No. This will withstand light pressure and will resist tears.

Why is ADFORS screen flame resistant and the competition's screen is not?

ADFORS screen was tested per the ASTM standard test for flame resistance. Our coating is specially formulated to contain flame-resistant properties.

What are ASTM tests D3656 and D6413?*

These two tests measure the flame time, flame height, and char length of the screen when exposed to a flame source and after removal of the flame source. *Testing results available upon request.

What makes ADFORS screen safer?

ADFORS Pet Screen is ortho-phthalate free and does not contain any substances covered under California Prop 65. We have maintained the same great aesthetics, properties and processibility that our screen has always had. We have also achieved GREENGUARD Gold certification on this product, which certifies that the product has low chemical emissions.
